

TIPS FOR INSIDE-OUT COLOUR SCHEMES

- Paint the same colour inside and out for total visual continuity.
- For subtle difference between inside and out, choose an interior neutral and a similar colour but a couple of shades darker or lighter for the outside.
- Neutrals are very fashionable and suit any style of home.
- If there is a feature wall in the kitchen and family room area, use the same colour as a feature outside to visually connect the two areas.
- Create the feeling of rooms reaching into the garden by painting all garden fences to tie in with the internal colour scheme.
